

String passed to texttree:

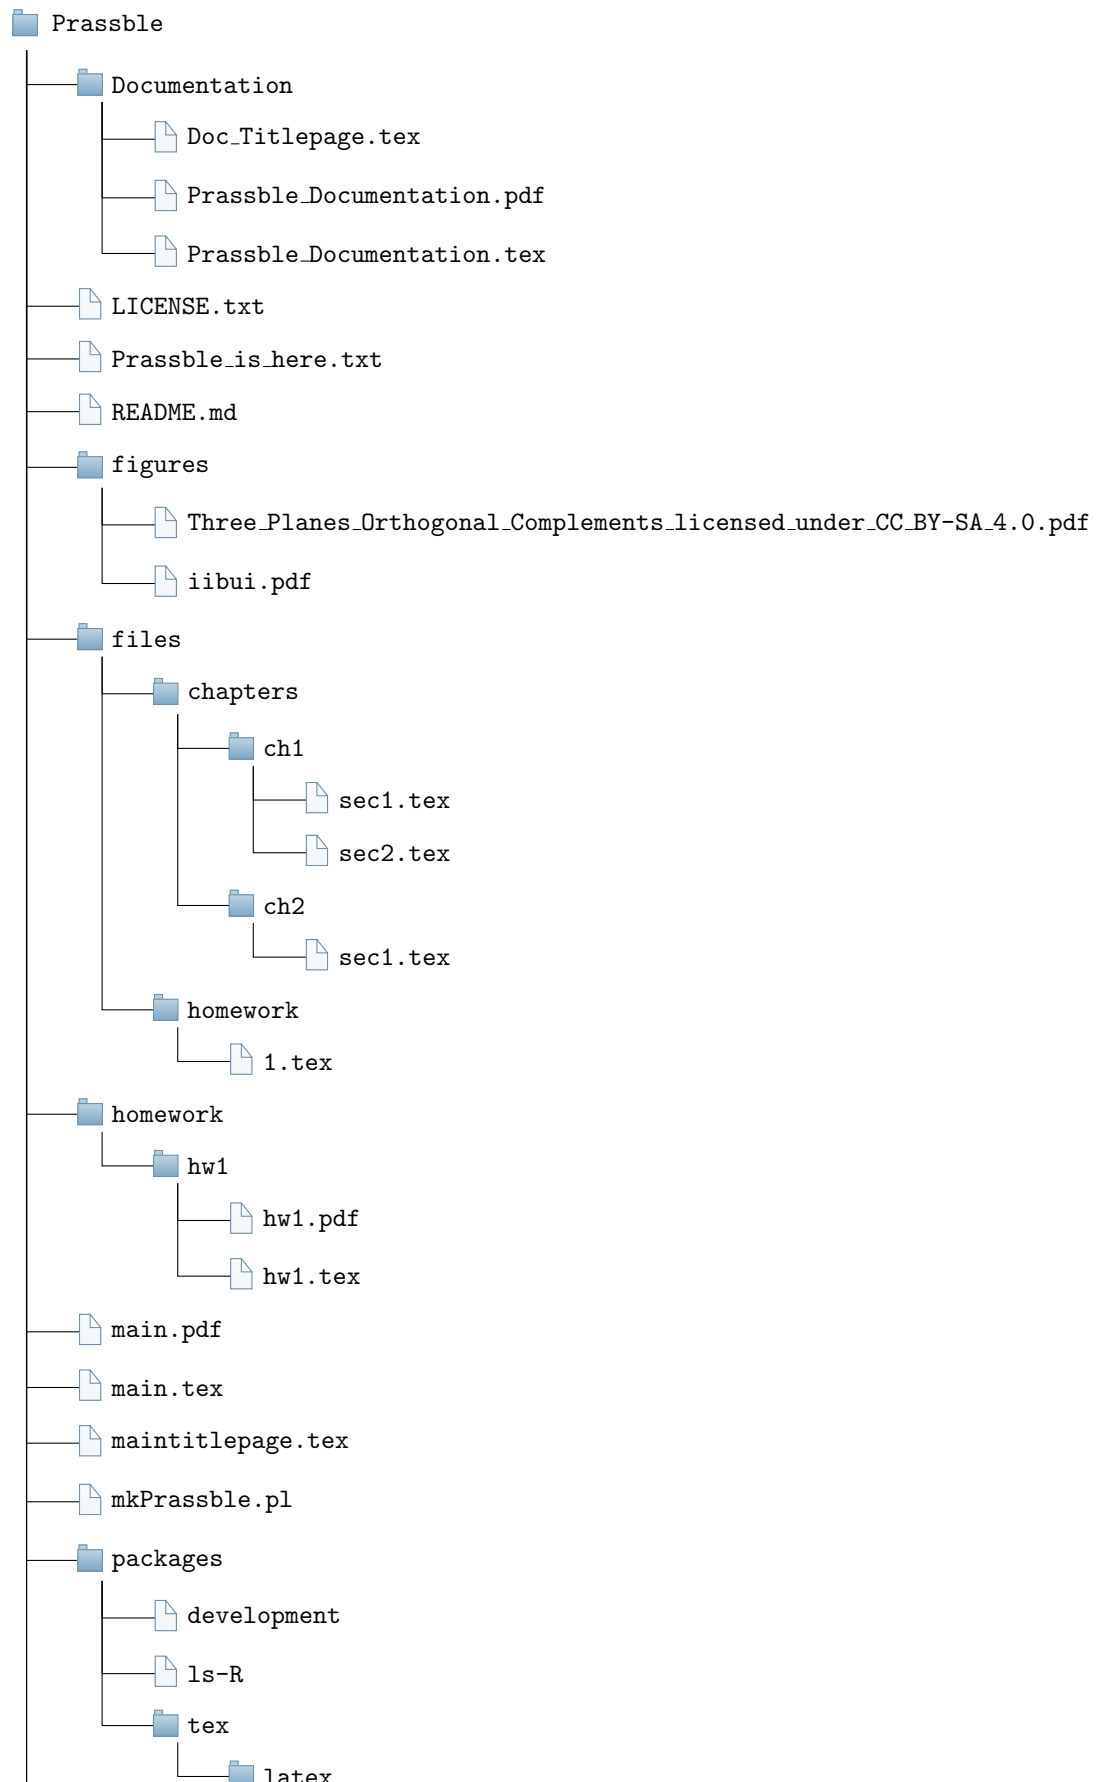

```
texttree -i "folder" -o "FileTrees/tree_3.tex" "./"
```

String passed to textree:

```
textree -i "*.sty" -O "FileTrees/tree_4.tex" "./"
```

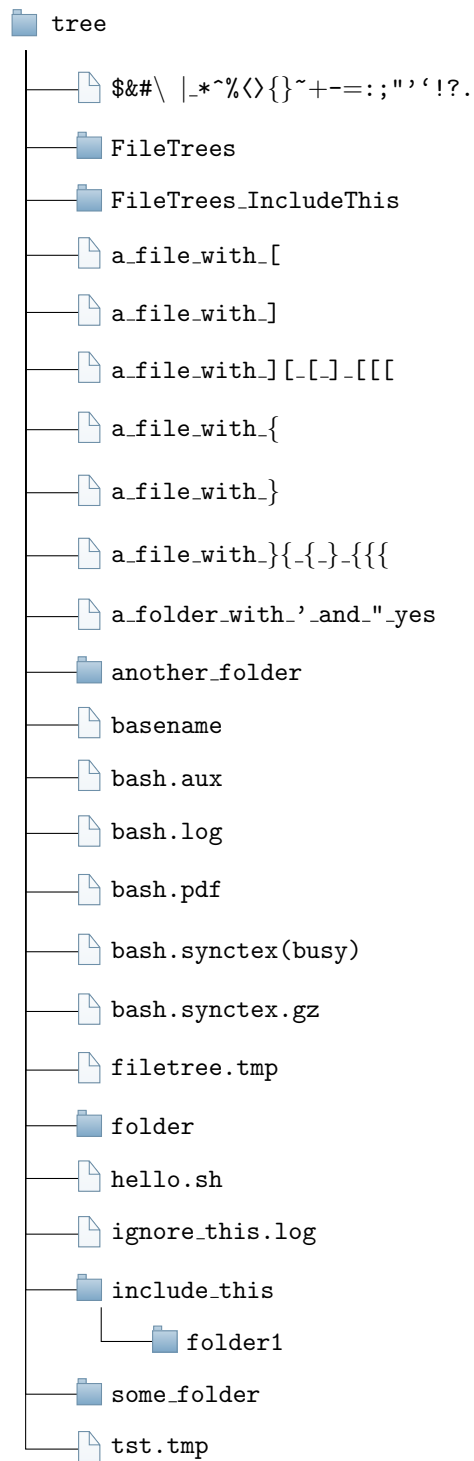

This should include all files, be it `.aux`, `.log`, etc.

String passed to `texttree`:

```
texttree -I "*.tex" -O "FileTrees/tree_6.tex" "./"
```

Here: what

Yay this now works correctly: `../../preamble/commands/modified`commands/../../../files/chapters`

`../../preamble/commands/modified`commands/../../../files/chapters/foo`

`../../preamble/commands/modified`commands/../../../files/chapters`
